15 April 2009

Arsenova-Härtel, N., H. Bludau, R. Schumacher, W. O. Haag, H. G. Karge, E. Brunner and U. Wild: Catalytic and Sorption Studies Related to the para Selectivity in the Ethylbenzene Disproportionation over H-ZSM-5 Catalysts. In: *Journal of Catalysis* **191**, 326–331 (2000).

Arsenova-Härtel, N., H. Bludau, W. O. Haag and H.G. Karge: Influence of the zeolite pore structure on the kinetics of the disproportionation of ethylbenzene. In: *Microporous and Mesoporous Materials* **35–36**, 113-119 (2000).

Berkov, D. V., P. Görnert, N. Buske, C. Gansau, J. Mueller, M. Giersig, W. Neumann and D. S. Su: New method for the determination of the particle magnetic moment distribution in a ferrofluid. In: *Journal of Physics D: Applied Physics* **33**, 331-337 (2000).

Böttger, I.: Kupfer als Katalysator für die Partialoxidation von Methanol. Doktorarbeit, Freie Universität Berlin, FB Biologie, Chemie, Pharmazie, Berlin, Germany (2000).

Böttger, I., T. Schedel-Niedrig, O. Timpe, R. Gottschall, M. Hävecker, T. Ressler and R. Schlögl: Catalytic methanol oxidation over copper: observation of reaction-induced nanoscale restructuring by means of in situ time-resolved X-ray absorption spectroscopy. In: *Chemistry - A European Journal* **6**, 10, 1870-1876 (2000).

Brenn, U., H. Ernst, D. Freude, R. Herrmann, R. Jähnig, H. G. Karge, J. Kärger, T. König, B. Mädler, U.-T. Pingel, D. Prochnow and W. Schwieger: Synthesis and characterization of the layered sodium silicate ilerite. In: *Microporous and Mesoporous Materials* **40**, 43-52 (2000).

Buergi, T., F. Atamny, A. Knop-Gericke, M. Hävecker, T. Schedel-Niedrig, R. Schlögl and A. Baiker: Adsorption mode of ethyl pyruvate on platinum: An in situ XANES study. In: BESSY annual report 1999. (Eds.) BESSY GmbH. Berliner Elektronenspeicherring-Gesellschaft für Synchrotronstrahlung m.b.H. (BESSY), Berlin (2000) 347-349.

Buergi, T., F. Atamny, A. Knop-Gericke, M. Hävecker, T. Schedel-Niedrig, R. Schlögl and A. Baiker: Adsorption mode of ethyl pyruvate on platinum: an in situ XANES study. In: *Catalysis Letters* **66**, 109-112 (2000).

Bukhtiyarov, V. I., M. Hävecker, A. Knop-Gericke, R. W. Mayer and R. Schlögl: XANES study of oxygen species adsorbed on silver. In: BESSY annual report 1999. (Eds.) BESSY GmbH. Berliner Elektronenspeicherring-Gesellschaft für Synchrotronstrahlung m.b.H. (BESSY), Berlin (2000) 251-253.

Concepcion-Heydorn, P., C. Jia, D. Herein, N. Pfänder, H. G. Karge and F. C. Jentoft: Structural and Catalytic Properties of Sodium and Cesium Exchanged X and Y Zeolites, and Germanium-Substituted X Zeolite. In: *Journal of Molecular Catalysis A: Chemical* **162**, 1-2, 227-246 (2000).

Coker, E. N., Ch. Jia and Hellmut G. Karge: Adsorption of Benzene and Benzene Derivatives onto Zeolite H-Y Studied by Microcalorimetry. In: *Langmuir* **16** (3), 1205-1210 (2000).

Damaschun, G., H. Damaschun, H. Fabian, K. Gast, R. Krober, M. Wieske and D. Zirwer: Conversion of yeast phosphoglycerate kinase into amyloid-like structure. In: *Proteins* **39**, 204-211 (2000).

Elmer, J. W., J. Wong and T. Ressler: In situ observations of phase transformations during solidification and cooling of austenitic stainless steel welds using time-resolved X-ray diffraction. In: *Scripta Materialia* **43**, 8, 751-757 (2000).

Find, J., Z. Paál, H. Sauer, R. Schlögl, U. Wild and A. Wootsch: Structures, surfaces state and catalytic properties of a model Pt catalyst. In: 12th International Congress on Catalysis. (Eds.) Corma, A.; Melo, F. V.; Mendioroz, S.; Fierro, J. L. G. *Studies in Surface Science and Catalysis* **130**. Elsevier, Amsterdam (2000) 2291-2296.

Find, J., Z. Paál, R. Schlögl and U. Wild: An attempt to bridge the pressure and material gap with a disperse model catalyst for low-temperature alkane reforming. In: *Catalysis Letters* **65**, 19-23 (2000).

Günter, M. M., R. E. Jentoft, B. Bems and T. Ressler: In situ XAS studies on Cu/ZnO catalysts in methanol steam reforming. In: *Jahresbericht 2000 Annual Report 1*. (Eds.) W. Dick, T. Kracht, U. Krell, G. Materlik, J. R. Schneider. Hamburger Synchrotronstrahlungslabor HASYLAB at Deutsches Elektronen-Synchrotron DESY, Hamburg, Seq. No.: 1 (2000) 793-793.

Günther, W., N. Pfänder, G. Weinberg, R. Liedtke, J. Nissen and R. Schlögl: Morphology and texture of nanocrystalline copper prepared electrochemically from oxides. In: *Journal of Material Science* **35**, 3963-3975 (2000).

Hävecker, M.: Untersuchung der Methanoxidation über Kupfer(poly) mittels Hochdruck-in-situ Röntgenabsorptionsspektroskopie im weichen Energiebereich von 200 eV bis 1000 eV. Doktorarbeit, Technische Universität Berlin, Berlin (2000).

Hävecker, M., A. Knop-Gericke, T. Schedel-Niedrig and R. Schlögl: About the role of oxide phases in the methanol oxidation over copper foil studied by in situ XAS. In: BESSY annual report 1999. (Eds.) BESSY GmbH. Berliner Elektronenspeicherring-Gesellschaft für Synchrotronstrahlung m.b.H. (BESSY), Berlin (2000) 286-287.

Hartl, M., B. Spandl, H.-J. Wölk, P. Behrens, H. Hartl and R. Schlögl: XAFS-investigation of CuO-based engobes - the system CuO-Al₂O₃-SiO₂ at temperatures from 850C°-1150C°. In: Jahresbericht 2000, Annual Report 1. Hamburger Synchrotronstrahlungslabor HASYLAB at Deutsches Elektronen-Synchrotron DESY, Hamburg (2000).

Hunger, R., D. S. Su, A. Krost, D. Ellmer, H. J. Lewerenz and R. Scheer: Structure of extended defects in epitaxial CuInS₂/Si(111). In: Thin Solid Films **361-362**, 437-442 (2000).

Jentoft, R. E., A. H. P. Hahn, F. C. Jentoft, R. Schlögl and T. Ressler: Mn and Zr K edge in situ XAS measurements of promoted sulfated zirconia catalysts. In: Jahresbericht 2000, Annual Report 1. (Eds.) W. Dick, T. Kracht, U. Krell, G. Materlik, J. R. Schneider. Hamburger Synchrotronstrahlungslabor HASYLAB at Deutsches Elektronen-Synchrotron DESY, Hamburg (2000) 803-804.

Joseph, Y., W. Ranke and W. Weiss: Water on FeO(111) and Fe₃O₄(111): Adsorption behavior on different surface terminations. In: Journal of Physical Chemistry B **104**, 3224-3236 (2000).

Joseph, Y., M. Wuehn, A. Niklewski, W. Ranke, W. Weiss, C. Wöll and R. Schlögl: Interaction of ethylbenzene and styrene with iron oxide model catalyst films at low coverages: a NEXAFS study. In: Physical Chemistry Chemical Physics **2**, 5314-5319 (2000).

Kanzow, H., A. Ding, J. Nissen, H. Sauer, T. Belz and R. Schlögl: Formation of chains of graphitic nanoparticles by heating fullerene blacks covered with thin metal films. In: Physical Chemistry Chemical Physics **2**, 12, 2765-2771 (2000).

Knop-Gericke, A., M. Hävecker, T. Schedel-Niedrig and R. Schlögl: High-pressure low-energy XAS: a new tool for probing reacting surfaces of heterogeneous catalysts. In: Topics in Catalysis **10**, 3-4, 187-198 (2000).

Knop-Gericke, A., M. Hävecker, T. Schedel-Niedrig and R. Schlögl: Probing the electronic structure of an active catalyst surface under high pressure reaction conditions: the oxidation of methanol over copper. In: Catalysis Letters **66**, 4, 215-220 (2000).

Kuhrs, C.: Adsorption und Katalyse auf epitaktischen Eisenoxid-Modellkatalysatorschichten. Doktorarbeit, Freie Universität Berlin, Berlin, Germany (2000).

Kuhrs, C. and W. Weiss: Structure-reactivity correlations across the pressure-gap studied on epitaxial iron oxide model catalyst films. *Studies in Surface Science and Catalysis* **130**. Elsevier (2000) 2225-2235.

Lisiecki, I., A. Filankembo, H. Sack-Kongehl, K. Weiss, M.-P. Pileni and J. Urban: Structural investigations of copper nanorods by high-resolution TEM. In: *Physical Review B* **61**, 7, 4968-4974 (2000).

Lisiecki, I., H. Sack-Kongehl, K. Weiss, J. Urban and M.-P. Pileni: Annealing process of anisotropic copper nanocrystals: 1. cylinders. In: *Langmuir* **16**, 8802-8806 (2000).

Lisiecki, I., H. Sack-Kongehl, K. Weiss, J. Urban and M.-P. Pileni: Annealing process of anisotropic copper nanocrystals: 2. rods. In: *Langmuir* **16**, 8807-8808 (2000).

Maksimova, N. I., O. P. Krivoruchko, G. Mestl, V. I. Zaikovskii, A. L. Chuvilin, A. N. Salanov and E. B. Burgina: Catalytic synthesis of carbon nanostructures from polymer precursors. In: *Journal of Molecular Catalysis A* **158**, 301-307 (2000).

Maksimova, N. I., V. V. Roddatis, G. Mestl, M. J. Ledoux and R. Schlögl: Oxidative dehydrogenation of ethylbenzene to styrene over carbonaceous materials. In: *Eurasian Chem. Tech. Journal* **2**, 231-236 (2000).

Mayer, R. W., M. Hävecker, A. Knop-Gericke and R. Schlögl: In situ XAS in the soft X-ray range: Ammonia oxidation over copper. In: *BESSY annual report 1999*. (Eds.) BESSY GmbH. Berliner Elektronenspeicherring-Gesellschaft für Synchrotronstrahlung m.b.H. (BESSY), Berlin (2000) 306-307.

Mestl, G.: In situ Raman spectroscopy - a valuable tool to understand operating catalysts. In: *Journal of Molecular Catalysis A* **158**, 1, 45-65 (2000).

Mestl, G.: Raman Spectroscopy. In: *Spectroscopy of Transition Metal Ions on Surfaces*. (Eds.) Weckhuysen, Bert M.; Van Der Voort, Pascal; Catana, Gabriela. Leuven University Press, Leuven (2000) 197-220.

Mestl, G., C. Linsmeier, R. Gottschall, M. Dieterle, J. Find, D. Herein, J. Jäger, Y. Uchida and R. Schlögl: Molybdenum oxide based partial oxidation catalysts: 1. thermally induced oxygen deficiency, elemental and structural heterogeneity and the relation to catalytic performance. In: *Journal of Molecular Catalysis A* **162**, 463-492 (2000).

Nepijko, S. A., D. N. Ievlev, W. Schulze, J. Urban and G. Ertl: Growth of rodlike silver nanoparticles by vapor deposition of small particles. In: *ChemPhysChem* **1**, 3, 140-142 (2000).

Polli, A. D., T. Wagner, A. Fischer, G. Weinberg, F. C. Jentoft, R. Schlögl and M. Rühle: Structural Characterization of ZrO₂ Thin Films Produced via Self-Assembled Monolayer-Mediated Deposition from Aqueous Dispersions. In: *Thin Solid Films* **379**, 1-2, 122-127 (2000).

Proceedings of the 216. WE-Heraeus Seminar on Nitrogen in Solids and at Solid Surfaces: Present Status and Future Trends. Ilmenau, Germany, May 30-June 2, 1999. Guest Editor: J. A. Schaefer, R. Schlögl and M. Stutzmann. *phys. stat. sol. (a)* **177**, 1, 1-171 (2000).

Ranke, W., Y. Joseph and W. Weiss: Energetische und kinetische Parameter aus Adsorptions-Isobaren: Ethylbenzol, Styrol und Wasser auf Eisenoxiden. (Frühjahrstagung der DPG, 2000-03-27 to 2000-03-31, Regensburg, Germany) *Last modified: 2000-03-25*.

Ranke, W. and W. Weiss: Adsorption and thermal decomposition of ethylbenzene and styrene on Pt(111) studied by UPS and XPS. In: *Surface Science* **465**, 3, 317-330 (2000).

Reinke, P., A. Knop-Gericke, M. Hävecker and T. Schedel-Niedrig: Interaction of diamond with water: an in situ XANES investigation. In: *Surface Science* **447**, 1-3, 229-236 (2000).

Ressler, T., R. E. Jentoft, J. Wienold, M. M. Günter and O. Timpe: In situ XAS and XRD studies on the formation of Mo suboxides during reduction of MoO₃. In: *Journal of Physical Chemistry B* **104**, **27**, 6360-6370 (2000).

Ressler, T., O. Timpe, T. Neisius, J. Find, M. Dieterle, G. Mestl and R. Schlögl: Time-resolved XAS investigations of the reduction / oxidation of MoO_{3-x}. In: *Journal of Catalysis* **191**, 75-85 (2000).

Ressler, T., J. Wong, J. Roos and I. L. Smith: Quantitative speciation of Mn-bearing particulates emitted from Autos burning (methylcyclopentadienyl)manganese tricarbonyl-added gasolines using XANES spectroscopy. In: *Environmental Science & Technology* **34** (**6**), 950-958 (2000).

Rühle, T., O. Timpe, N. Pfänder and R. Schlögl: Tribochemical activation of iron oxide for the reduction of NO with CO: how lattice defects can influence the catalytic activity. In: *Angewandte Chemie International Edition* **39**, 23, 4379-4382 (2000).

Rühle, T., O. Timpe, N. Pfänder and R. Schlögl: Tribochemische Aktivierung von Eisenoxid für die Reduktion von NO mit CO: Wie Gitterbaufehler die katalytische Aktivität beeinflussen können. In: *Angewandte Chemie* **112**, 23, 4551-4554 (2000).

Sanchez-Cortezon, E., G. Mestl, M. Schur and R. Schlögl: The role of carbon defects in the selective oxidation of methanol to formaldehyde investigated by response surface methods. In: Applied Catalysis A:General (2000).

Savinova, E. R., D. Zemlyanov, B. Pettinger, A. Scheybal, R. Schlögl and K. Doblhofer: On the mechanism of Ag(111) sub-monolayer oxidation: a combined electrochemical, in situ SERS and ex situ XPS study. In: Electrochimica Acta **46**, 175–183 (2000).

Schedel-Niedrig, T., M. Hävecker, A. Knop-Gericke and R. Schlögl: Partial methanol oxidation over copper: active sites observed by means of in situ X-ray absorption spectroscopy. In: Physical Chemistry Chemical Physics **2**, 3473-3481 (2000).

Schedel-Niedrig, T., T. Neisius, I. Böttger, E. Kitzelmann, G. Weinberg, D. Demuth and R. Schlögl: Copper (sub)oxide formation: a surface sensitive characterization of model catalysts. In: Physical Chemistry Chemical Physics **2**, 2407-2417 (2000).

Shaikhutdinov, S. K., M. Ritter and W. Weiss: Hexagonal hetero-layer(s) on a square lattice: a combined STM and LEED study of FeO(111) on Pt(100). In: Physical Review B **62**, 7535-7541 (2000).

Shaikhutdinov, S. K. and W. Weiss: Surface structures and adsorbate dynamics on epitaxial iron oxide films studied by scanning tunneling microscopy. In: Journal of Molecular Catalysis A: Chemical **158**, 129-133 (2000).

Shaikhutdinov, S. K., W. Weiss and R. Schlögl: Interaction of potassium with Fe₃O₄(111) at elevated temperatures. In: Applied Surface Science **161**, 3-4, 497-507 (2000).

Su, D. S., W. Neumann and M. Giersig: Structure modifications in chalcopyrite semiconductors. In: Thin Solid Films **361-362**, 218-222 (2000).

Tham, A. T., D. S. Su, W. Neumann, P. Schubert-Bischoff, C. Beilharz and K. W. Benz: Transmission electron microscopy study of CuIn₃Se₅. In: Crystal Research and Technology **35**, 6-7, 823-830 (2000).

Urban, J., H. Sack-Kongehl, K. Weiss, I. Lisiecki and M.-P. Pileni: Structures of clusters. In: Crystal Research and Technology **35**, 6-7, 731-743 (2000).

Weiss, W. and R. Schlögl: An integrated surface science approach towards metal oxide catalysis. In: Topics in Catalysis **13**, 75-90 (2000).

Wild, U., D. Teschner, R. Schlögl and Z. Paál: Surface composition and possible rearrangement of disperse Pt and Rh catalysts: does the presence of carbon and oxygen contribute to different catalytic properties?. In: *Catalysis Letters* **67**, 93-98 (2000).

Wölk, H.-J., A. Scheffler, G. Mestl and R. Schlögl: Investigations of the selective partial oxidation of methanol and the oxidative coupling of methane over copper catalysts. In: 12th International Congress on Catalysis. (Eds.) Corma, A.; Melo, F. V.; Mendioroz, S.; Fierro, J. L. G. *Studies in Surface Science and Catalysis* **130**. Elsevier Science B. V., Amsterdam (2000) 3537-3542.

Wühn, M., Y. Joseph, P. S. Bagus, A. Niklewski, R. Püttner, S. Reiß, W. Weiss, M. Martins, G. Kaindl and C. Wöll: The electronic structure and orientation of styrene adsorbed on FeO(111) and Fe₃O₄(111) - a spectroscopic investigation. In: *The Journal of Physical Chemistry B* **104**, 7694-7701 (2000).

Yang, J., G. Mestl, D. Herein, R. Schlögl and J. Find: Reaction of NO with carbonaceous materials: 1. Reaction and adsorption of NO on ashless carbon black. In: *Carbon* **38**, 715–727 (2000).

Yang, J., G. Mestl, D. Herein, R. Schlögl and J. Find: Reaction of NO with carbonaceous materials: 2. Effect of oxygen on the reaction of NO with ashless carbon. In: *Carbon* **38**, 729–740 (2000).

Yang, J., E. Sanchez-Cortezon, N. Pfänder, U. Wild, G. Mestl, J. Find and R. Schlögl: Reaction of NO with carbonaceous materials: III. Influence of the structure of the materials. In: *Carbon* **38**, 2029–2039 (2000).

Zemlyanov, D. and R. Schlögl: Effect of oxygen on NO adsorption on the Ag(111) surface: evidence for a NO_{3,ads} species. In: *Surface Science* **470**, L20-L24 (2000).

Zemlyanov, D., G. Weinberg, U. Wild and R. Schlögl: Formation of a liquid film of AgNO₃ on a silver surface. In: *Catalysis Letters* **64**, 113-118 (2000).
